

The Management of TUBE-MAC PIPING TECHNOLOGIES, S.L. establishes the following principles and commitments of its Integrated Management Policy in order to integrate the highest quality and respect for the environment in each and every one of its activities to offer its services.

To this end, the Management of TUBE-MAC PIPING TECHNOLOGIES, S.L. harmonizes the means and technical, productive, financial and human resources in a single structure and competitive decision-making direction in accordance with the following objectives:

- Create sustainable value propositions for the client that meet their needs and consolidate their loyalty as an essential premise for the continuity of our activity.
- Contribute to the continuous improvement of the services rendered to our clients.
- Establishment of continuous improvement as a fundamental principle of action based on preventing, rather than correcting process failures, damage and deterioration of health, and impacts and pollution on the environment, optimizing resources in favor of sustainable development.
- To generate and foster internal communication channels that ensure the participation, satisfaction and permanent training of workers, who, in short, are the direct protagonists of the continuous improvement of TUBE-MAC PIPING TECHNOLOGIES, S.L.
- Implement integrated management procedures, with the aim of ensuring compliance with applicable legislation and other requirements, which lead to prevention of pollution.
- Establish strategic partnerships with our suppliers to create commercial interactions of quality improvement and respect for the environment that create added value for both parties.

This policy, which is appropriate to the context of our organization, is communicated to the staff and understood by the staff, and there is a commitment on the part of their involvement and commitment to Quality Management.
